

Safety Switch - M0053

The safety switch prevents damage to the depth gauges by automatically closing off the pressure inlet when the pressure rises above a preset point.

- mechanical, antimagnetic, sea water resistant, maintenance free
- shock and vibration proof

areas of use: ship building, naval ship building
measuring media: sea water

Specifications		
connections:	M14x1,5 M18x1,5 M16x1,5 M20x1,5 G3/8"A G1/2"A G5/8"A * other options on request * pressure inlet and outlet can have different connections	
nominal size:	DN4 DN8 DN16	
nominal pressure:	PN40 PN50 PN70	
Technical Limitations		
operation temperature:	min 0°C	max +100°C
storage temperature:	-40°C	+125°C
weight:	1,5 kg	
pressure tolerance:		0,02 bar
hysteresis:		0,4 bar
Material		
casing:	bronze inconel	
seal:	copper	
spring:	stainless steel
